

Bicuspid

With the Bicuspid dental photography range, you won't waste any more time or lose sight of your images!

› Bicuspid

› DUAL-USE ANATOMICAL SHAPE

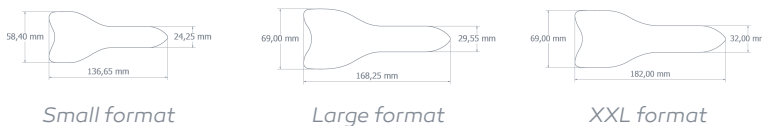

Bicuspid mirrors are designed to capture occlusal and lateral views with a single mirror!

The curved shape of the mirror's base conforms to the base of the tongue or the soft palate for more posterior occlusal views without causing discomfort to the patient.

The handle's end fits perfectly into the intermaxillary commissure for capturing lateral views down to the second and third molars..

› SIZES AVAILABLE

Only three sizes are available, which limits and simplifies stock management in the office.

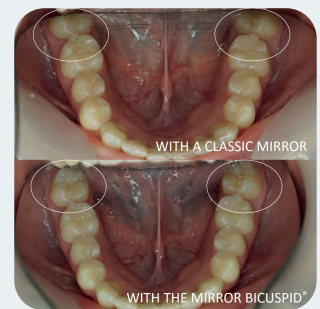

› AVAILABLE AS A REMOTE TRACKING KIT

Bicuspid mirrors are now available in a plastic version, making them safe for direct patient use: the "My Orthodontic Follow-Up" kit is already revolutionizing the dentistry of tomorrow!

This small kit, which you provide to your patients, allows you to remotely monitor the progress of their treatments or perform preliminary diagnoses, thus becoming a valuable asset in managing your schedules and treatments..

Advantages :

Occlusal view

Lateral view

> STORAGE AND CLEANING RACKS

What's more annoying than seeing your mirrors scratched or damaged, or with cleaning residue (watermarks) spoiling the clarity of your photographs?

Storage and cleaning racks protect and extend the life of your mirrors and instruments!

> Vertical rack

This rack has a capacity of 8 photographic mirrors and 10 straight instruments (examination mirrors, probes, etc.).

It is designed for use in a thermal scrubber.

The slots for photographic mirrors are compatible with most mirrors on the market.

> Horizontal rack

This rack has a capacity of 6 mirrors or straight instruments.

It is designed for use in a soaking tank or ultrasonic cleaner.

It features adjustable brackets to accommodate your various instruments.

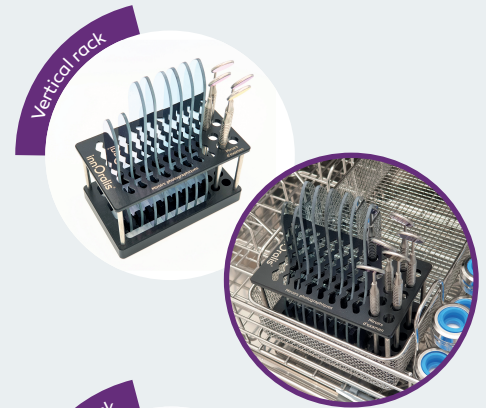

> MIRRORS HEATER

The mirror heater prevents fogging on mirrors when taking photos.

It comes with a programmable timer that allows it to turn on automatically according to your work schedule and to independently warm mirrors and examination instruments.

It can also be used to warm anesthetics for improved patient comfort!

Available models:

Other storage and cleaning racks are available in our « Professional Organization » range.
