

Thumbye

Say “Goodbye” to thumb sucking with Thumbye!

Thumbye is a new, ready-to-use solution to help young patients stop thumb sucking thanks to its triple action !

› Concept and advantages

› TRIPLE ACTION

The glove is made of perforated 3D mesh, which allows an air leak and thus prevents the suction effect desired by the child.

Its texture causes discomfort when inserting the thumb into the mouth.

The glove is equipped with a clip-on safety wristband that prevents the patient from removing the glove himself during the night. Only parents can do this by cutting the wristband.

› HYGIENIC

The fabric used to make this glove is a breathable, soft, and comfortable technical textile.

It is also machine washable, ensuring daily cleaning.

The safety wristbands are made of fabric and come in packs of 10, allowing for daily replacement, or they can be replaced during handwashing, for example.

It has been found that after a few days, the wristbands no longer need to be used, as the child has learned the glove's purpose. However, additional wristbands are available as an option if treatment needs to be extended.

Advantages :

Playful approach for the child

Easy to use at home

Machine washable

Quick stop in less than 10 days

Designed by orthodontists

› EDUCATIONAL

The Thumbye comes in attractive, informative packaging to encourage patient appreciation and cooperation from the first use or during the consultation.

The Thumbye also comes with an educational booklet that retraces the adventures of Coco Lapin, explaining to the patient why he should stop sucking his thumb and the complications it can cause.

There are three glove sizes: 3-5 years, 6-8 years, and 9-11 years.

Each glove has a booklet tailored to the age group: the booklet for 3-5 years is very playful and colorful, while the booklet for 9-11 years is a little more educational and introspective.

› Technical characteristics

› SIZES AVAILABLE

3-5 years : orange seams and wristbands

6-8 years : green seams and wristbands

9-11 years : blue seams and wristbands

› CONTENTS OF A KIT

- 1x Glove
