

Concept Xplan®

From explanation to treatment, it has never been so quick!

Responding to work spaces always more downsized, more and more demanding patients and a growth of the temporal pressure, Xplan® is a furniture concept especially designed to reinvent our daily way to work.

➤ Concept and advantages

› ERGONOMICS AND HYGIENE

Its user-friendly configuration in two parts confers a multifunctional potential which saves us time and contributes to bring a positive image of our practice : we can, in the same area, efficiently talk with our patients with a presentation screen, manage our computer files and be ready to care for our patients, without losing eye contact with our management software.

Its layout at the side of the chair and separated from other technical elements enable optimize flows between patient, practitioner and assistant. The result is a smooth and user-friendly operation which in long term ensures an effective and serene practice that meets hygiene standards.

Its design, made from high quality and rigorously selected materials, answer to strict hygiene standards and safeguard a sustainable durability..

› UNIVERSAL DESIGN

With a combination of two shapes and several materials, Xplan® is as customizable as we want. Optimized dimensions enable integration into all environments and all decorative styles.

Its refined and elegant design provides a warm and welcoming soul to the treatment area where impersonal atmosphere usually prevails.

Its "all inclusive" kit presentation enables your IT system to be quickly integrated with the Xplan® solution.
